DRYING-TECHNOLOGY

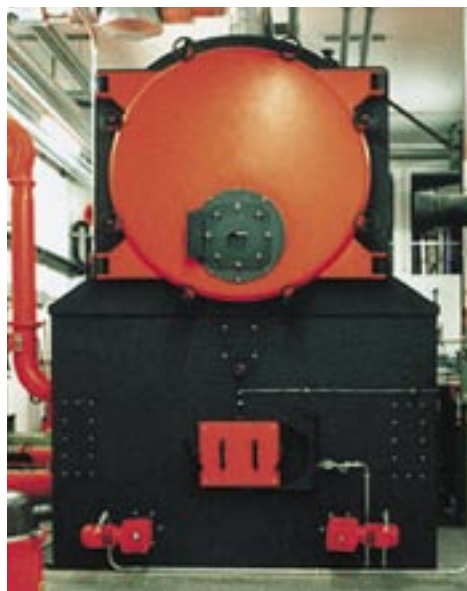

Single and double track kilns

For faster drying times, MÜHLBÖCK offers single and double track kilns. These dry kilns are ideal for softwood with short drying cycles. Our track kilns are made from the same quality components as our other kiln types. For quicker drying, a booster heat register is added between the tracks. The design of our track kilns is such that they can obtain the maximum benefit from MÜHLBÖCK's patented "Harmony-System".

Turn-key installations

MÜHLBÖCK provides complete, turn-key installations from planning and construction up to line set-ups. In addition we provide heat distribution installations, boilers and the foundation.

Boiler options:

- hot water
- steam
- thermal oil

Fuel possibilities:

- wood waste
- natural gas
- fuel oil

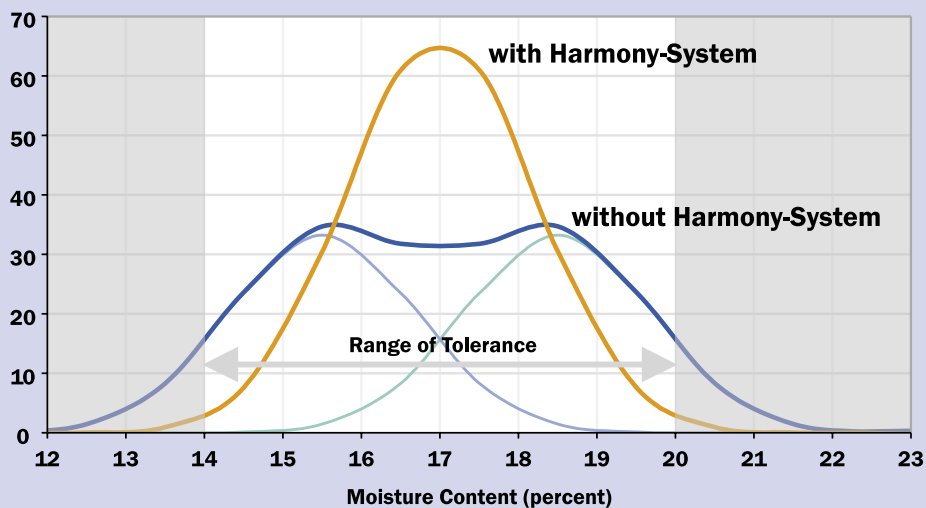

Special advantages of MÜHLBÖCK track dry kilns

- Short drying times.
- High throughput.
- Perfect air and temperature distribution for economic drying.
- A very robust and long-lasting kiln construction: the primary structure is made of high-tensile, corrosion-resistant aluminium beams.
- The lift-sliding door simplifies operation and offers ample space to accommodate loading on both ends of each track.
- The patented “Harmony-System” is our recipe for success against a wide dispersion in the initial moisture content in softwoods. The system offers considerable improvements in comparison to multi-zone control. Dispersions at the start of drying is recognised and evened out by means of different drying speeds. The result is persuasive: a min. of 50% reduction in “wets” as a result of final moisture dispersions.

Distribution of final moisture content

What our customers have to say:

“Since December 2004 we at Apollo Forest Products are drying with our new MÜHLBÖCK double track kiln. With this new kiln we reach much shorter drying times compared to our existing kilns combined with a better end quality. We are deeply impressed with MÜHLBÖCK’s handling of the project and are looking forward to further cooperation with them. For us it is very clear that your drying success is only guaranteed with a MÜHLBÖCK kiln.”

Dale Slorstad, Plant Manager, Apollo Forest Products Ltd.
